NATURAL DISASTERS

September 2017

Doing Our Part TO HELP

When significant catastrophic events occur in the world we, as a company, like to unite and do the best we can to help out.

For Hurricane Harvey we teamed up with Team Rubicon, an organization made up of volunteers that respond to disasters around the world. We donated several CASE machines for their clean-up efforts and they will most likely be transferred to other locations to aid with the aftermath of Hurricanes Irma and Maria. It will be a while before those machines return to our inventory, but we are glad to help out.

If you're interested in donating money you may do so with these organizations:

Now our country's southern neighbor has been hit by 2 violent earthquakes within a 2-week span.

The earthquakes in central Mexico were powerful enough to level buildings and at least 200 people have been reported dead, including children at a demolished school. In response to the tragedy, many organizations are accepting donations to help the earthquake victims.

Here are a couple of reputable outfits actively working to aid relief efforts.
